

Monitoring & Reporting - Case Studies in Africa

Presentation on

Case Studies in Africa on
Monitoring & Information System

Jean-Marie BARRAT

Dakar, 5 Nov. 2004

Monitoring & Reporting - Case Studies in Africa

WWAP Background

UN-WWAP (*World Water Assessment Programme*)
was created in 2000 (*Secretariat hosted by UNESCO*)

*It is a UN programme bringing together
24 United Nations agencies to produce
a triennial global evaluation of freshwater
and its management:*

The first *World Water Development Report*
(WWDR) was issued in 2003

Monitoring & Reporting - Case Studies in Africa

Framework

WWAP, UK-DfID funds:

*In 2003 WWAP received funding from DfID
to undertake development of
National Freshwater Assessments
in five African countries*

Monitoring & Reporting - Case Studies in Africa

Beneficiaries

Gov. of (*Ministries of Water*):

- **South Africa**
- **Uganda**
- **Kenya**
- **Ethiopia**
- **Mali**

Financial Means

- National contribution, and
- \$50,000 per country from WWAP/DfID

Monitoring & Reporting - Case Studies in Africa

Main Objective

Monitoring Progress Against Targets

- *To support the development & implementation of a « **National Monitoring, Evaluation and Reporting System for the Water sector** », (including “**Development of Indicators at National Level**”), which will lead:*
- *To the creation of periodic “**National Water Development Reports**” (NWDRs), based on the WWDR structure.*

Monitoring & Reporting - Case Studies in Africa

Scope

The scope covers a macro view of the Water Sector through use of

Key Indicators

defined at each level, and use them as a measure of progress

*towards achieving **Targets** set for:*

- National, and
- Millennium Development Goals (MDGs)

Monitoring & Reporting - Case Studies in Africa

Methodology

➔ *at national level:*

- project team (task force), - working groups,
- stakeholders meetings, - consultants, and
- exchange of experience with other countries.

➔ *at Global level:*

- co-ordination, harmonisation, technical assistance,
- workshops on *Indicators*, and on *Monitoring & Reporting themes*

Monitoring & Reporting - Case Studies in Africa

Main outcomes (as of Aug. 2004)

Overall Achievements

- **Stakeholders Meetings** *leading to:*
- *Definition of specific **Targets** and **key Indicators***
- **Populate Indicators** (e.g. RSA:35/1300 selected indicators)
- *Set up of **National Monitoring & Reporting system***
- ***Draft National Water Reports***

Monitoring & Reporting systems

- adopted structures for developing M&R systems by the 5 countries are +/- similar

Monitoring, Evaluation & Reporting Systems

Secretariat

Teams:

- Co-ordinators
- Techn. Supports
- Team Members

Basic Needs

Water Supply

Sanitation

Health

*Water Sector National Committee on
Monitoring & Information System*

Water Availability

Sharing

Risks

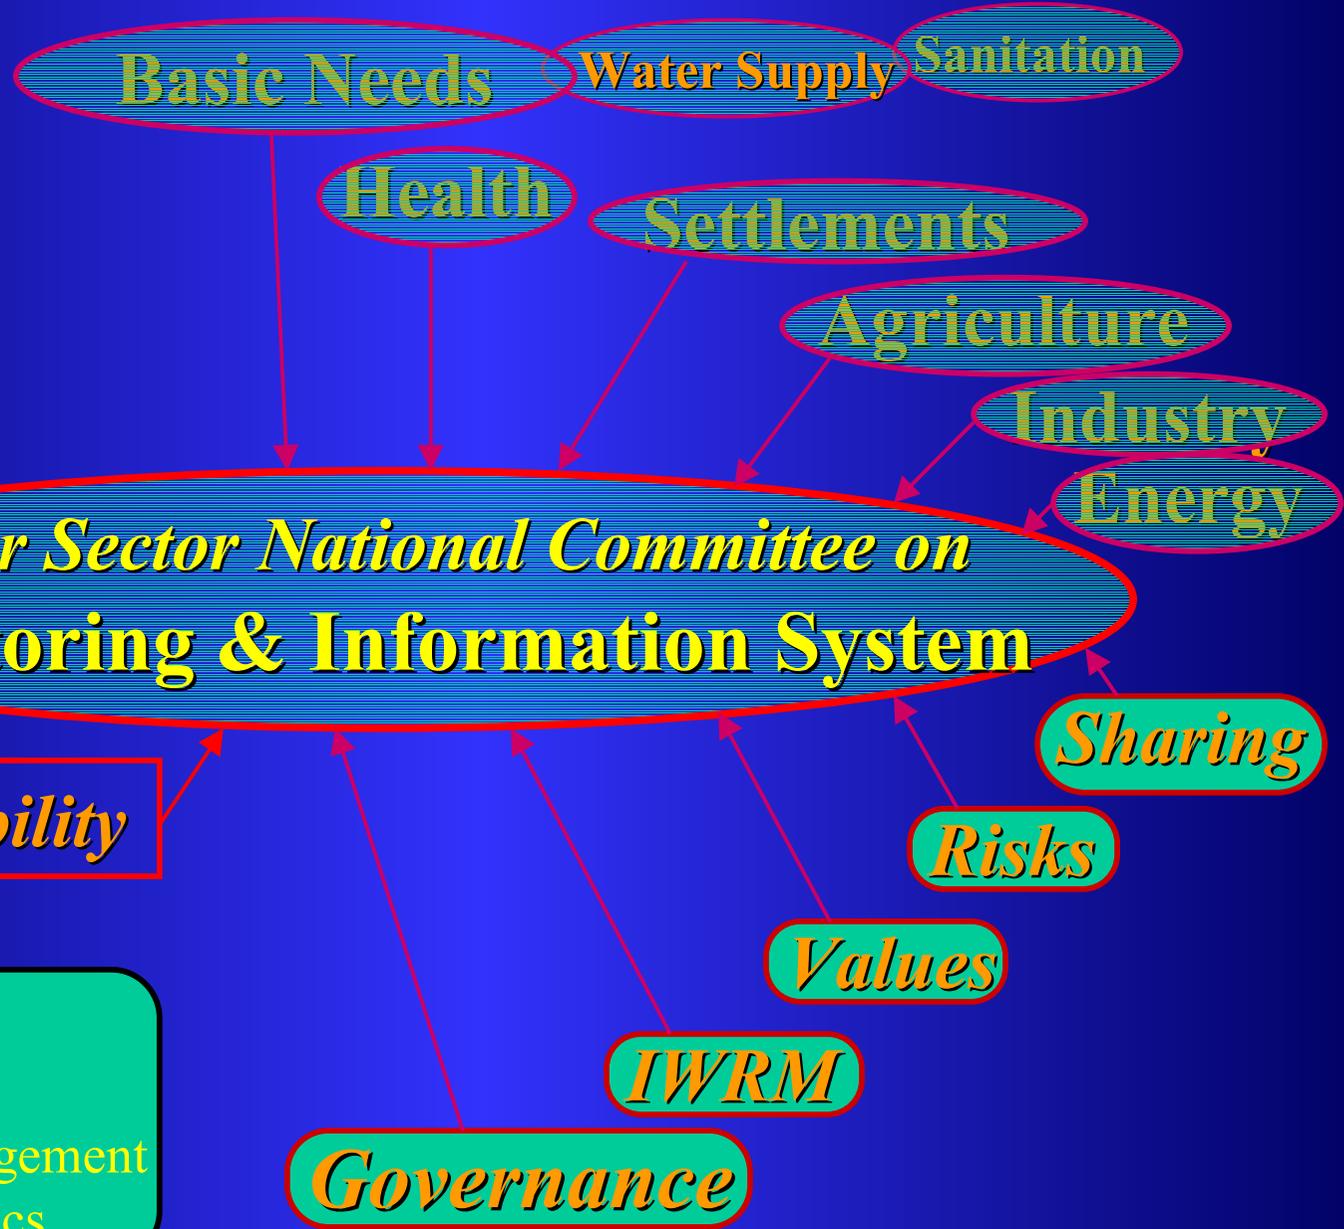

Values

IWRM

Governance

Means:

- Monitoring Units
- Information Management
- Bureaux of Statistics

Monitoring & Reporting - Case Studies in Africa

What's Next ?

- Can we expect *yearly national reports* on water sector?
- Are the developed **M&R systems sustainable** without further technical and financial supports?

Annexes

- **National Water Reports' contents on Goals & Indicators**
- **Why Stakeholder Workshops?**
- **Indicators' Definition: Is it possible/wise to standardise?**
- **Example of S.A. Access to Water Indicator**
- **S.A. Key Indicators and ME&R System**

Monitoring & Reporting - Case Studies in Africa

Need for a National Reporting System

- To use common data & procedure for reporting
- To ease data & information flow
- To show trends and predict scenarios
- To support decision-making and ease refinement of strategic plans and targets.
- To report both globally and internally within sector.
- To disseminate knowledge
- To ease the production of periodic reports

National Water Reports

- Quote Sources for Any Information & Data Set
- Any Chapter/theme starts with:
 - *Goals, Targets, Objectives*
 - *List of Indicators with Comprehensive Definitions*
- Any Chapter ends with Indicators Table:

Goals/Targets Title							
	1990		1992	2002	2003
Indic 1							
Indic 2							
Indic 3							
....							
Indic n							

Monitoring & Reporting - Case Studies in Africa

Why Stakeholder Workshops?

- Stakeholder workshops are not a once-off consultation, but a continuous input from the Stakeholders.
- Each sub-sector role-player takes ownership.
- Need for effective Data Flow and Data Responsibility.

To deliver we need:

- Identify committed stakeholders / members who will contribute in writing & editing.
- Establish sub-sector ownership, and long-term links and cooperation.
- Develop suitable Indicators per challenge area for national reporting system.
- Develop Information system, and National Reporting System.
- Assess available information & identify data gaps.
- Design products (report, web site, CD rom).
- Agree on report framework.

WWAP - Case Studies in Africa

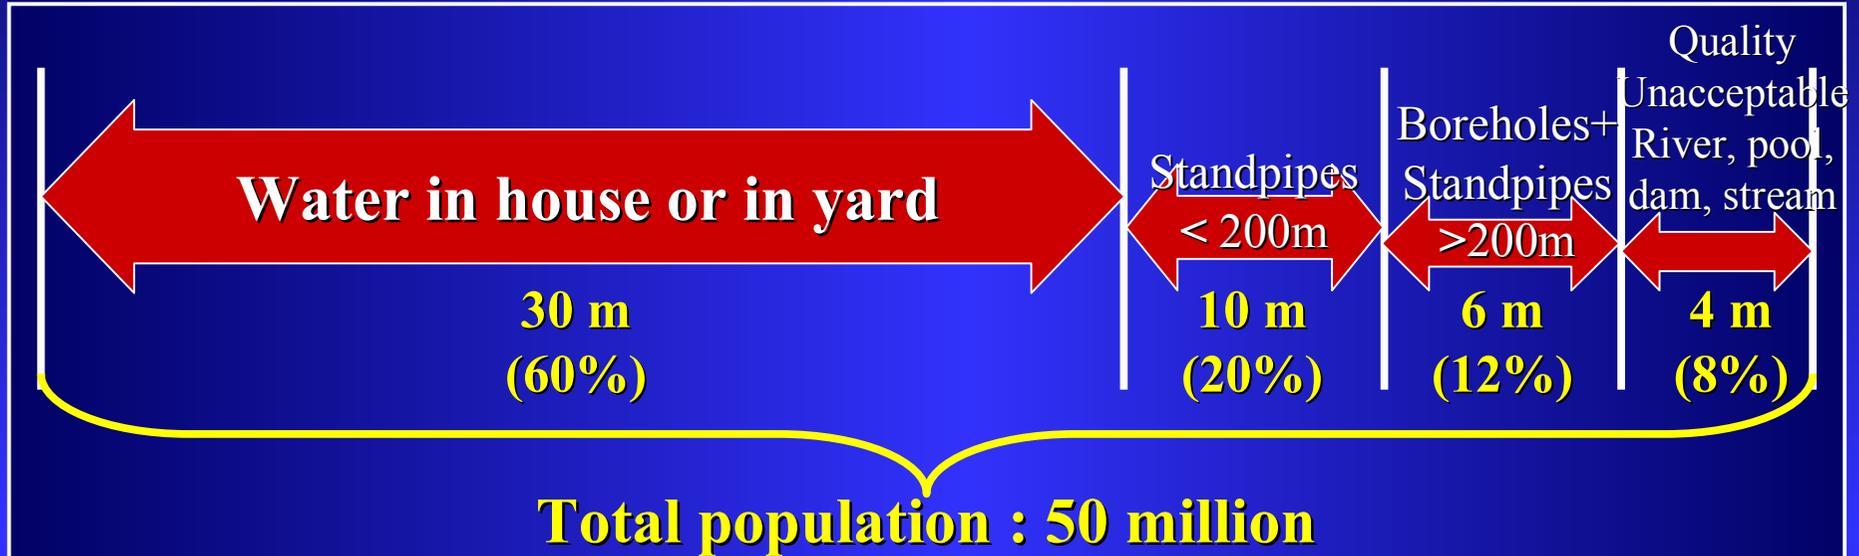

Indicators' Definition

Is it possible/wise to standardise?

Examples of South-African Indicators Definition on:
1- Access to Water

S.A. Access to Water

(displayed figures are NOT the actual ones)

Perspective 1: People to be brought up to a bare minimum supply i.e. safe source but still lacking quality **4 m (8%)**

Perspective 2: Total people to be brought to within 200m **10 m (20%)**

Perspective 3: Total people to be brought up to in-house/yard connections **20 m (40%)**

Note : These figures reflect access to infrastructure, not necessarily effective services e.g water quality, flow & sustainability

S.A. Key Indicators and ME&R System

Key Indicators

- **1300** indicators in use in S.A. water sector
- **350** were considered relevant, and
- **35** selected for reporting at a national and global level, covering all 11 WWAP challenge areas

National M&R Systems and Water Reports

- Developing *Monitoring, Evaluation & Reporting* system has become a national priority for S.A.
- Developing *National Water Development Reports* is a guidance for the other water reports.

Progress with Key Indicators

S.A.

- Identified > *1300* Indicators
- Reviewed their need, use, priority & applicability
- *350* Indicators Selected to describe WWAP topics
- Deliberating Usefulness, Availability & Data Gaps
- Stakeholder review and refinements
- Need to align S.A. KPIs with global indicators.
- Final: *35 Key Indicators*
