

BOOSTING THE DEVELOPMENT OF WATER AND CLIMATE PROJECTS: PARTNERING FOR INCUBATION

CONCLUSIONS

Venue: MDB Pavilion, Hall 8
Date: Tuesday 10th, 09.00 - 10.00

I-Climate Change is a cross-cutting priority for Water Security

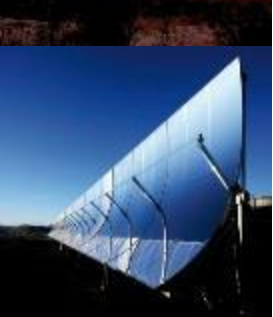

Climate change has altered assumptions about water resources and the vulnerability of water infrastructure to major climatic events. These impacts are likely to affect the programs designed to protect water quality, public health, and safety.

II-Low water security in Africa

*hinders inclusive and green growth and,

* Induced a huge need for funding.

III-HOW TO PREPARE BANKABLE PROJECTS, RESILIENT TO CLIMATE CHANGE, FOR FINANCIAL RESOURCE MOBILIZATION

IV-Water related Climate Finance at the AfDB

The AfDB manages or has access to different Facilities that provide multiple instruments (preparation grant, grants, concessional debt, equity, etc.) which ultimately enhance project bankability, build resilience to climate change and support transition to green growth in Africa.

AfDB's role
